

## External Experts Expression of Interest

Call for Evaluators is ongoing – Apply until 28<sup>th</sup> April

Vojext aims to set up an External Poll of Evaluators to support the review process of the proposals received from the Open Call #1 Challenge. This poll gathers a set of recognized experts selected through an open process to ensure transparent and consistent evaluation of the proposals.

We are looking for **experts in robotics domains**, including cognitive robotics and cyber-physical systems (CPSs) with a proven track record in the technical areas corresponding to the open call scope.

### What are the benefits for the evaluators?

1. Be reimbursed for evaluation work
2. Get to know innovative solutions in cognitive robotic domains
3. Play a role in the selection of SMEs
4. Be an important part of the VOJEXT project and related ecosystem

### Services required

Services will be carried out remotely and will involve evaluation of the applications received, and participation in consensus meetings. **This process will last approximately 3-4 weeks (May/June 2021)**. All evaluators will be required to sign a non-conflict of interest declaration and a contract with the VOJEXT project coordinator, before being accepted to evaluate a specific application.

### Remuneration

Evaluators will be reimbursed for their time and effort on the basis of the number of proposals evaluated, with each proposal corresponding to a value of **75€**, **considering 1,5 hours** to evaluate each proposal.

Need more information? Feel free to get in touch: [opencall@vojext.eu](mailto:opencall@vojext.eu) and we will get back to you shortly!

### Application

**Important Notice:** Please note that this expression of interest to participate in the VOJEXT Open Call #1 Challenge evaluation as an external expert is NOT binding and does NOT constitute any commitment to the VOJEXT project. The selection of the experts to support VOJEXT in the evaluation of the VOJEXT Open Calls will be taken at a later stage, since it depends on the number of received proposals, their origin, the domain that they target as well as the origin of the potential evaluators, their affiliations, their expertise and the balance between various criteria (e.g. gender, background, affiliation type, expertise etc.). Furthermore, we are obliged to frequently change experts helping us with evaluations.
